

# **Sharpe Decisions Inc. Newsletter**

**January – February 2005**

## **NEW YEAR 2005**

Sharpe Decisions Inc. hopes that you have a safe, healthy and prosperous 2005.

## **Sharpe Decisions<sup>®</sup> Executive Workshop<sup>®</sup>**

We are already making plans to provide upgrade versions of Sharpe Decisions<sup>®</sup> Executive Workshop<sup>®</sup> this year. Our first release should be in May but we will keep you informed. Remember, if you have any suggestions on how we can improve our product, we are always interested in hearing them.

## **Sharpe Decisions<sup>®</sup> Democracy Workshop**

We are currently updating our Democracy Workshop voting software. Democracy Workshop makes in-house elections fast and efficient.

Democracy Workshop allows for Demographics, Double-Majority voting, the Cross-Tabbing of vote data and will provide the number of Spoiled Ballots. More and more organizations prefer to use electronic voting in their Association and Union Elections rather than the old paper ballot method.

## **Sharpe Decisions<sup>®</sup> Web Survey**

We have further developed and improved Sharpe Decisions<sup>®</sup> Web Survey software used on a rental contract basis. This product will be available soon for sale as well, so that clients can run their own Web Surveys.

## New Reseller “Down Under”!

Sharpe Decisions Inc. is pleased to announce a new Reseller for our products in Australia. Risk Wizard, [www.riskwizard.com](http://www.riskwizard.com), is a leading provider of risk management software. We look forward to a long and prosperous relationship!

## TIP!

### **Did you know that:**

The Formula function allows for the Addition, Subtraction, Multiplication and / or Division or any Dimension results against other Dimension results in an Executive Workshop<sup>®</sup> file? It will also allow you to “normalize” the end product to fit on the 1 – 10 maximum scale provided in the Item X-Y Plot. You are also able to tell the software what scale length you want a Formula Dimension plotted on in the Item X-Y.
