

Sharpe Decisions Inc. Newsletter

September - October 2006

THANK YOU!

We would like to thank our new clients for choosing Sharpe Decisions Executive Workshop! Most of our recent sales have been made to clients using our product for Risk Assessment and Control Self Assessment. We are pleased that you saw the benefit of buying from Sharpe Decisions Inc. We hope you use our technology regularly and remember, if you have any questions or problems, we are here for you!

We would also like to thank the clients who rented our voting services for their meetings and conferences this year. The meeting types have ranged from Staff Surveys and Risk Assessment Workshops to Conference Key-Note sessions. We have had many very large Conference rentals, ranging up to 650 keypads, and we appreciate your business.

Just a reminder, if you own a Sharpe Decisions Executive Workshop system you can always rent additional keypads for meetings larger than your current keypad set. Your receiver will collect votes from 1 to 250 keypads.

For those of you looking into buying a voting system, we would be pleased to run a demonstration for you over the web. You will see, first hand how intuitive Executive Workshop is and how feature rich!

NEW RELEASE

A new release of Sharpe Decisions Executive Workshop will be shipped in October, 2006. We will include, with the CD, a short description of the changes we have made to the software. The new manuals, in English and French, are also included on the CD. **PLEASE NOTE: Uninstall all other versions of Sharpe Decisions Executive Workshop BEFORE loading the new version on your computer.** An error will appear if you do not follow this process.

We hope you enjoy using our new features! Remember, we like to hear from you regarding your voting software needs, so if you have any suggestions regarding future Executive Workshop features, please pass them onto us. You, our clients, are our first priority!

TIP!

Did you know that:

The SD Reporter in Sharpe Decisions Executive Workshop allows you to create a variety of reports. Any of these reports can be opened, edited and re-saved in Word Processing or Spreadsheet programs. Comments and additional charts and graphs can be added easily.
